Harsh Kumar

UX/UI & Product Design | Figma, Prototyping, Accessibility | Seeking January 2027 Co-op

Surrey, BC | 705-229-6995 | harshkuar96@gmail.com
linkedin.com/in/harshkumaruxui | harshbuilds-1.github.io | github.com/harshbuilds-1

SUMMARY

User-centered UX/UI and product designer completing a master's in Digital Media, with 4+ years of web development experience. Moves from heuristic review and usability testing to wireframes, Figma prototypes and accessible, working interfaces.

SKILLS

UX/UI Design: User-centered design, design thinking, wireframes, mock-ups, prototypes, interaction design, visual design

Research & Accessibility: Usability testing, heuristic evaluation, accessibility (WCAG 2.2, ARIA, screen readers), design rationale

Information Design: User flows, information architecture, customer journey mapping, data visualization (D3.js)

Tools: Figma, Adobe XD, AI-assisted prototyping (Claude, ChatGPT/Codex), HTML, CSS, JavaScript, React, Unity

EDUCATION

Northeastern University Expected Dec 2027

Master of Professional Studies (MPS), Digital Media | Vancouver, BC

- Coursework: Usability and Human Interaction, UX/UI Design, Game Design Fundamentals, Web Development, Data Visualization

Guru Nanak Dev University May 2018

Bachelor of Technology (B.Tech), Computer Science and Engineering | Punjab, India

EXPERIENCE

Freelance Web Designer and Developer Jun 2026 – Present

Self-employed | Client: Hair by Gurbina (live salon website) | Metro Vancouver, BC

- Redesigned the information architecture of a live salon website, repositioning it from bridal-only to full-service.
- Mapped a 5-stage customer journey (inquiry, booking, consultation, consent, policies) and restructured content to match.
- Linked booking calls to action to online booking and added mobile WhatsApp contact for questions before booking.
- Debugged a mobile blank-screen bug and fixed it with a timed fallback for a scroll-reveal (IntersectionObserver) effect.

Assistant Team Lead Sep 2024 – Jul 2025

Honda of Canada Manufacturing | Machine Operator, Sep 2023 – Aug 2024 | Alliston, ON

- Supervised 8–12 team members per shift on a robotics production line while maintaining 98% on-time delivery.

Full-Stack Developer Jul 2022 – Aug 2023

Div Edge Technologies | Mohali, India

- Built responsive, reusable React components for 8+ web applications, improving user satisfaction scores by 30%.
- Worked with cross-functional teams in Agile sprints, helping increase sprint velocity by 25%.

Web Developer Aug 2018 – Dec 2021

Ops Solutions Pvt. Ltd. | Chandigarh, India

- Developed responsive websites with semantic HTML, CSS, JavaScript and ARIA attributes to support accessibility.

PROJECTS

Compass Card | Heuristic Evaluation May 2026

Independent academic case study | Desktop and mobile

- Evaluated compasscard.ca against Nielsen's 10 usability heuristics on desktop and mobile, identifying 8 usability issues.
- Proposed 3 redesigns with mock-ups and documented the design rationale, scope and limits of the evaluation.

Adaptive Legibility | Accessibility Prototype Jun 2026

Northeastern University | Three-person team

- Co-designed an interactive prototype where a translucent UI adapts its opacity to keep text legible on changing backgrounds.
- Compared three design treatments under brightness, complexity and glare controls, using WCAG contrast as the constraint.

Unity Game Prototypes | Game UX and HUD Design Oct – Nov 2026

Last Signal, Tidebound, Tide Rush + 5 prototypes | Playable at harshbuilds-1.github.io/games

- Designed HUDs that bring key information to players: off-screen indicators, a tide timeline and non-colour danger cues.
- Applied the MDA framework and playtest notes to tune rules; code written with AI assistance (Claude, ChatGPT/Codex).
